

## FITCH AFFIRMS GROUPE BPCE AT 'A+'

Fitch Ratings-London-11 October 2011: Fitch Ratings has affirmed Groupe BPCE's (GBCPE), BPCE S.A.'s (GBPCE's central body) and Natixis's Long-term Issuer Default Ratings (IDR) at 'A+' and Short-term IDR at 'F1+'. The agency has also affirmed GBPCE's Viability Rating (VR) at 'a-'. A full list of rating actions is at the end of this comment.

GBPCE's IDRs are driven by the agency's view that the probability of French state support, if required, is extremely high given the group's domestic importance. The VR reflects the group's strong domestic retail franchise, solid loan quality, profitability in line with peers and satisfactory liquidity, but also its weak capital ratios and dependence on wholesale funding.

Natixis's IDRs are aligned with those of its 72% shareholder, GBPCE, due to its affiliation with BPCE S.A. Natixis's IDRs will continue to move in tandem with those of its parent. Given Natixis's extremely strong integration within GBPCE, it has not been assigned a Viability Rating and the Individual Rating will be withdrawn at end-2011.

In Fitch's view, GBPCE's bad days are behind it and the group now generates at least EUR2.5bn in operating profit semi-annually. Profitability is likely to remain at this level in the near future. With a 67% cost/income ratio and around a 13% operating return on equity, GBPCE's current profitability is in line with that of its peers despite a more conservative business mix.

Compared with its French peers, GBPCE's operating income has been remarkably stable since mid-2009, the run-off activities have posted positive contributions since H209, and loan impairment charges are the lowest in the sector. Impairment charges booked in Q211 on Greek sovereign debt using similar assumptions to peers were also the lowest among large French banks, at only EUR83m.

At 3.6%, GBPCE's non-performing loan (NPL) ratio is one of the lowest in France. The 56% coverage ratio is understandable given that collateral is adequate. Crisis-related net problem exposure, one of the group's biggest weaknesses, has been reduced to around EUR10bn, 32% of Fitch core capital and write-downs look appropriate.

GBPCE's loan book is only 70% financed by customer deposits, and the group is a large debt issuer in the market. Liquidity is not a problem for the group, notably owing to its large stock of unencumbered repoable assets (around EUR100bn after haircut).

Fitch considers the group's 7.9% Fitch core capital/weighted risks ratio as weak compared with the high standards set in some other European countries and considering the size of the legacy asset portfolio it retains.

GBPCE ranks second in French retail banking, controlling a market share of over 21%. Commercial banking and insurance generate two-thirds of the group's operating profit.

GBPCE's VR could benefit from higher capitalisation, lower dependence on wholesale funding and continued reduction of legacy assets. Its IDRs would be downgraded if Fitch perceived a weakening of the state's willingness to support large French banks.
